Westbaan 287, 2841 MC Moordrecht, The Netherlands

EasyLogic has provided Registration and Access Control Solutions for the Netherlands Ministry of Foreign Affairs for the Nuclear Security Summit in 2014, and the Global Conference on CyberSpace 2015, and again for the Presidency of the Council of the European Union in 2016.

- Registration of delegations and other attendees (press, personnel)
- Workflow for participant selection, vetting and exchange with external (security) agencies
- Personalisation, printing and issuing of long range readable RFID access badges
- Creation of database for biometric identification
- Access control gates with radar detection, long range RFID readers with antennas and optional biometric face recognition and matching

Benefits

- Unobtrusive, user friendly access control
- Handsfree
- Secure through biometric facilities
- Fine-grained access or zone definition possible
- Registration data can be adjusted by customer without reprogramming
