

EASY LOGIC

SMART ID SOLUTIONS

System Design and Integration for Custom Solutions

EasyLogic is capable of developing custom solutions using RFID and Radio. We develop hardware, embedded software and complete web based solutions specific for customers.

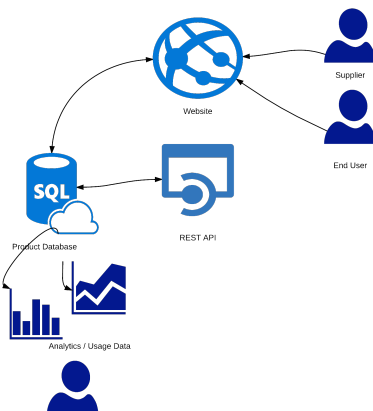

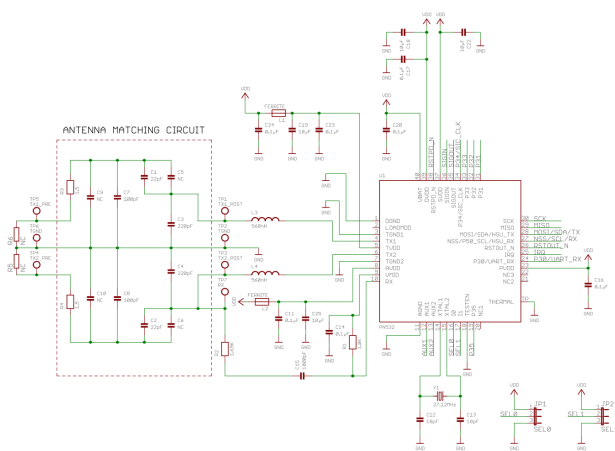

The applications we have developed solutions for include productivity and work management, tracking and tracing, authentication of consumable materials, access control for parking garages and bicycles, and loyalty and prepayment card solutions.

EasyLogic Capabilities

- Design end-to-end solutions
- Design, develop and produce hardware
- Design and deliver embedded software
- Integrate standard RFID products to provide solutions
- Experts in making RFID work in difficult conditions (liquids, metal, reflections, temperature, humidity)
- We can program and personalise Cards, RFID tags and labels on our own production facilities
- Expertise in LoRaWan, BLE, WiFi, 433 and 868MHz bands
- IoT, sensor networks, real-time location systems

Benefits

- RFID links the physical world to your IT systems
- We interface with your ERP, Warehouse Management, Asset Management or POS system
- Prevents errors, rework and false information
- Saves time through automated scanning
- Improves the end-user experience
- Quick time to market
- EasyLogic co-develops solutions with you
